### Other charges

Please note that additional fees, charges, and surcharges apply to your service. For a complete listing of all fees, charges, and surcharges, including charges for the installation or modification of service, please visit our website at [www.comcast.com/cdv/termsofservice](http://www.comcast.com/cdv/termsofservice) or call 1-888-COMCAST.

Service is for residential customers located in Comcast serviceable areas only and is subject to availability. Multi-product discounts for Unlimited Package require continuous subscription to all specified Comcast products. Prices shown do not include federal, state, or local regulatory fees, taxes, or surcharges; our Regulatory Recovery Fee, which is not a tax or government mandate; or other applicable charges (e.g., operator service calls, installation, maintenance, or repair charges). Service is subject to the Comcast Digital Voice Subscriber Agreement and other applicable terms and conditions. Prices shown are effective August 1, 2006, and are subject to change. Other restrictions apply. Please visit our website for additional information or contact us at 1-888-COMCAST.

## Plan Details

With Time Warner Cable Digital Phone service you can make unlimited calls anywhere in the U.S. and Canada for one low monthly price. As a Digital Phone customer you can call anytime, anywhere and talk for as long as you want without worrying about extra charges, confusing plans or variable bills!

- Make unlimited calls anywhere in the U.S., Canada and Puerto Rico for one low monthly price - call anyone, anytime, anywhere. Across the street, across the state, or across the country, the price doesn't change.
- Competitive rates for all your other calls - International, directory assistance and operator services are billed at competitive rates with other major carriers.
- Get popular and convenient calling features included at no extra charge - Call Waiting, Caller ID, Call Waiting ID, Call Forwarding and more!
- Free no-hassle installation - Digital Phone from Time Warner Cable works with existing phones and jacks, so there's nothing extra to buy.
- It's one price, on one bill, from one company. It doesn't get any easier than that.

Cox Communications received the highest numerical score among telephone service providers in the West in the proprietary J.D. Power and Associates 2006 Residential Telephone Customer Satisfaction StudySM. Study based responses from 12,196 consumers measuring 7 providers in the West (AZ, CA, CO, IA, ID, MN, MT, ND, NE, NM, NV, OR, SD, UT, WA, WY) and measures opinions of consumers who received their local and long distance service from one provider. Proprietary study results are based on experiences and perceptions of consumers surveyed between March–April 2006. Your experiences may vary. [Visit jdpower.com](#).

## Internet/Voice Bundle

[Products & Services > Intelligent Transport Solutions](#)

### Description

Optimum Lightpath's Internet/Voice Bundle gives your business Internet access, as well as the ability to make and receive voice calls, over a dedicated Ethernet connection. It delivers cost-effective, high-bandwidth Internet connectivity at a variety of speeds, plus flat-rate voice service for a specified number of minutes per month (local, regional and U.S. domestic long distance), with no additional charges for voice facilities.

Optimum Lightpath's Internet/Voice Bundle brings new simplicity and cost stability to voice communications. It lets you benefit from a secure voice network that utilizes a time-tested switching architecture without worrying about separate per-line charges or charges for local, regional and U.S. domestic long distance. Instead, you simply purchase the level of voice usage per month that makes sense for your business. And Optimum Lightpath's Internet/Voice Bundle works with your existing customer premise equipment. You'll also save up to 50% as compared with traditional Internet and voice services. Depending upon your selected port speed, up to four usage packages are available (10,000, 50,000, 100,000 or 250,000 minutes).

### Features

Optimum Lightpath's Internet/Voice Bundle offers businesses the following features:

- Seven bandwidth options—5, 10, 20, 50, 100, 150 and 300 Mbps—at a price point well below traditional DS-3 and OCn connections
- up to 25 email accounts
- up to 25 MB of Web space
- IP allocation
- DNS
- Managed security solutions are also available (VPN, firewall)

### Benefits and Applications

Optimum Lightpath's Internet/Voice Bundle offers businesses the following advantages:

- A single, standards-compliant platform that can support all your business communications
- Easy installation and rapid provisioning
- Flexibility to tailor bandwidth requirements
- A variety of transport speeds
- Scalability

Optimum Lightpath's Internet/Voice Bundle also includes the added security, reliability and network availability of Optimum Lightpath Ethernet Service. The

following array of attributes distinguishes Optimum Lightpath's Ethernet from all other Ethernet-based services:

- The Optimum Lightpath optical network, designed with redundant optics and fiber throughout its core, distribution and access layers
- 24x7x365 network monitoring
- 99.99% network availability
- SONET-like, carrier class recovery rate of <50 ms
- Battery backup
- Four-hour mean-time-to-repair
- Service level commitments

## Press Releases

### Optimum Lightpath Connects 2,000th Fiber-Lit Building

*Mack-Cali Building in Suburban New Jersey is Latest to Benefit from Reliable, Facilities-Based Fiber Connectivity*

**JERICHO, NY, January 9, 2007** – Optimum Lightpath, the next-generation business broadband service provider of Cablevision Systems Corporation (NYSE: CVC), today announced that its network is now connected to 2,000 fiber-lit buildings in the New York metropolitan area. Optimum Lightpath achieved this milestone with the "lighting" of a Mack-Cali Realty Corporation (NYSE:CLI) building in Woodcliff Lake, New Jersey.

"One of Mack-Cali's objectives is to provide our tenants with the capacity, bandwidth and speed of fiber connectivity," commented Christopher DeLorenzo, vice president of leasing, Mack-Cali Realty Corporation. "Adding Optimum Lightpath's all-fiber network to this building allows us to accomplish this objective."

The Optimum Lightpath network now comprises more than 2,500 route miles of fiber optic cable (nearly 128,000 miles of actual fiber) within the New York metropolitan area, encompassing New York City, and the suburban areas of Long Island, Westchester County, Northern New Jersey and Southern Connecticut.

"Optimum Lightpath's success in surpassing this milestone is a direct result of the strong demand by medium-sized and larger businesses for full fiber optic connectivity, and the Mack-Cali building is the latest example of the advantages of the technology we can provide," said Dave Pistacchio, executive vice president and general manager, Optimum Lightpath. "Our business strategy is to bring Metro Ethernet services to businesses wherever they're located, and this full-market approach has fueled Optimum Lightpath's strong growth in each of the last two years."

For Optimum Lightpath, the significance of lighting 2,000 buildings is underscored by the fact that fully fiber optic connections are not generally available to the large number of businesses and branch offices in suburban areas. According to Vertical Systems Group, a networking industry market research firm, direct "local loop" fiber connectivity to commercial buildings with more than twenty employees nationwide has been measured at 11.7 percent. However, Optimum Lightpath is changing that imbalance by utilizing its state-of-the-art, all-digital optical network to bring the benefits of fiber optic connectivity to businesses located outside Manhattan.

Metro Ethernet simply and effectively provides organizations with the ability to link multiple locations, run bandwidth-intensive applications and converge multiple types of content over a single network. As a result, this emerging communications technology has the potential to transform how businesses operate and compete in today's economy.

Businesses interested in learning more about Optimum Lightpath's Metro Ethernet services can visit <http://www.metroethernetnow.com> or call 1-877-LIGHTPATH.

### **About Optimum Lightpath**

Optimum Lightpath, a business telecommunications services division of Cablevision Systems Corporation, uses the power of its reliable and resilient fully fiber optic network to deliver converged data, Internet and voice solutions to businesses throughout the New York metropolitan area. Since its formation 18 years ago, Optimum Lightpath built an advanced fiber-to-the-business-premises network extending more than 2,500 route miles throughout the tri-state area. As a result of owning and maintaining this state-of-the-art network, Optimum Lightpath is able to reliably provide scalable, high-capacity IP-based Metro Ethernet services that support high bandwidth data, Internet and voice applications and optimize the enterprise customer's quality of experience – at lower prices than traditional offerings.

Optimum Lightpath has been recognized for eight straight years by the New York State Public Service Commission for delivering highly personalized customer service superior to the competition. Winner of the Metro Ethernet Forum's 2006 Service Provider of the Year Award for Outstanding Innovation, Optimum Lightpath became one of the first service providers in the world and the only North American MSO to earn Carrier Ethernet certification from the Metro Ethernet Forum in April 2006. For more information, visit [www.optimumlightpath.com](http://www.optimumlightpath.com).

### **About Cablevision**

Cablevision Systems Corporation is one of the nation's leading entertainment and telecommunications companies. Its cable television operations serve more than 3 million households in the New York metropolitan area. The company's advanced telecommunications offerings include its iO: Interactive Optimum digital television, Optimum Online high-speed Internet, Optimum Voice digital voice-over-cable, and its Optimum Lightpath integrated business communications services. Cablevision's Rainbow Media Holdings LLC operates several successful programming businesses, including AMC, IFC, WE tv and other national and regional networks. In addition to its telecommunications and programming businesses, Cablevision owns Madison Square Garden and its sports teams, the New York Knicks, Rangers and Liberty. The company also operates New York's famed Radio City Music Hall, and owns and operates Clearview Cinemas.

### Standard Cox Voice Mail Features

Cox Voice Mail keeps your business running at maximum efficiency with a complete package of features that are simple to set up and easy to use:

Feature	Function
Automatic Call Back	Allows you to reply to your voice mail message with one call to your voice mailbox.
Extended Absence Greeting Unskippable	Creates a message that your callers can't bypass before they leave you a voice mail.
Future Delivery	Enables you to create up to 3 voice mails for delivery up to 15 days in the future.
Greeting Options	Two options are included. The Multiple Greeting option enables you to record up to five different greetings depending on the dialed number. And the Time Dependent Greeting option allows you to have different greetings for weekdays and weekends.
Group Lists	Create up to 15 group lists with 25 numbers each and send messages simultaneously to every member within your voice mail system.
Message Forwarding/Sending	Allows you to forward or send a voice mail to another mailbox within the system.
Message Recovery	Lets you recover deleted messages before you exit the voice mailbox.
Message Redirect	Allows you to forward a message to another mailbox or group list.
Message Replay	This feature has quick keys that save time by replaying messages with the press of a button.
Message Time/Date Stamp	Keeps you informed of the day and time of each call.
Personal Operator	Provides the call with the option to leave a message, or to touch "0" and be redirected to a predetermined number.
Prompts for Unplayed Messages	This prompt reminds you of any unplayed messages each time you enter your voice mailbox.

### Optional Cox Voice Mail Features

Choose from several optional Voice Mail features to further enhance your Cox Telephone service:

Optional Feature	Function
Automatic Message Forwarding	Lets you forward messages received in your mailbox to another mailbox or phone number.
Customized Bulletin Board Applications	Allows you to provide information about your business, such as hours of operation, directions, fax numbers, website address, etc.
Fax Administration	Enables you to receive voice mail and faxes in the same mailbox. You choose to automatically or manually direct faxes to print at a primary or secondary line location.
Message Notification to Pager, Telephone or Cellular Device	Alerts you to new voicemail messages.

Urgent Notification Only

Allows you to limit notification messages to only those marked "Urgent."

**How your business benefits from Cox Digital Telephone:**

- **More flexibility.**  
With a choice of packages and calling features, you can customize your service to ensure you have exactly the tools you need, including DID/DOD and POTs, Centrex service with integrated voice and fax mail capabilities, and much more.
- **Seamless integration.** Cox Digital Telephone integrates easily with your current telephone equipment, from standard desktop phones to large PBXs. Or add Centrex for self-managed telephone service.
- **Easy switchover.**  
You can keep your current numbers as well as your equipment to make switching easy and hassle-free.
- **Cost-effectiveness.**  
Choose only the services you need and the features you want with our competitive and simply priced plans and options — plus, save up to 20% compared to the local incumbent.\*
- **Easy upgrading.**  
Add capacity with such options as Cox DS-1 Digital Trunk for a T-1 connection or Cox PRI Digital Trunk service for ISDN clear channel connectivity. Or you can choose from our higher-capacity options to ensure your business will always have the capacity it needs.
- **Dependable transmission.** Our network protects against communications failure through fully redundant architecture and battery and generator backup. Plus we monitor our networks around the clock to prevent problems before they occur.
- **Crystal-clear connections.**  
Quality digital transmission means quality digital sound for all your critical voice communications.
- **Added services.**  
Get just what you need, from voice mail, long distance, toll free, directory assistance, and more.
- **More convenience.**  
Add Cox Business Internet<sup>SM</sup> to your communications, and enjoy the added convenience and efficiency of one bill from one provider and one local team meeting all your business communications needs.

### How your business benefits from Cox Voice Mail:

- **Quick and simple.** Access your voice mail quickly in the office or on the road.
- **Easy to use.** User-friendly functionality saves you valuable time.
- **Dependable.** Cox's service is reliable so you won't have to worry about a saved message getting lost or not receiving that important message.

\*Services and features not available in all areas. Up to 20% savings based on Cox's basic business lines with a Cox term agreement as compared to the incumbent provider's basic month-to-month rate. Business Class Phone

## Voice

As a small business, you need one provider that can work with you to deliver comprehensive communications solutions that enable you to compete in today's market. Voice communication is the one function that is vital for any business.

Business Class Phone offers your company a multi-line, crystal-clear, reliable phone service. Each line can be configured to meet your specific business feature and call restriction requirements. And you can keep your existing business phone numbers and telephone equipment.

Now, you can rely on one provider for account administration of your business communications needs, plus enjoy the convenience of a single invoice.

### Business Class Phone

We tailor our digital phone service to meet the needs of your small business.

**Service not available in all areas.**

## Network Services

Sonet | Ethernet Transport | IP Transit | Construction

RCN Business Solutions is a leading provider of communications services to carrier, enterprise and government marketplaces. RCN Business Solutions offers a comprehensive array of network services over our state-of-the-art fiber optic network. We will work to create a customized solution that fits your needs. With over a decade of experience, RCN Business Solutions has the experience needed to be your network service provider.

### The RCN Network

- Presence in five of the top US markets
- Over 3,500 route miles of metro fiber
- Over 800 commercial buildings on-net
- National IP backbone
- Class five switches in every market
- Video Headend in every market

### Local Loop Transport

RCN is quickly becoming the preferred choice to connect you from your POP to your partner's POP or directly to the customer premise. Our strength is in providing a true alternative to the "usual suspects" for local loop. Because of our extensive local networks and excellent access to **carrier hotels**, we offer complete independence from the ILEC and we specialize in Business continuity solutions and applications that require construction.

Our metro area services include

- SONET from DS-3 through all OC-n rates.
- Ethernet from 10 Mbps through 10 Gbps

### Voice Services

As a facilities-based carrier of competitive residential services, RCN built a robust local network that we own and operate. Our voice network features a Class 5 Switch in each of our six markets. We offer the following services to our customers:

- Local Origination
- Local Termination
- Facilities Based Local Services
- Long Distance
- 800# Service
- Audio Conferencing

### IP Transit

RCN Broadband, RCN Commercial, and RCN.com provide over 1 million customers direct Internet access. Our strong local network is complemented with a national IP backbone as well as an extensive list of peering partners.

### National and International Private Line

Our customers continually request that RCN apply our strong implementation and operational capabilities towards a long haul product. To answer this need, RCN has partnerships with several top tier long haul providers to extend our capabilities for long haul capabilities. This allows RCN to provide total solutions across markets that include both the local loop and the long haul portions of the circuit. We reach most major markets and all of the top international destinations.

## Small Business

### Phone Services

RCN Small Business representatives are trained to help you find the right telephone solution to meet your business needs. They'll work to help you lower your cost, and put together the package that will help you run your business more efficiently.

#### ■ Unlimited Calling

This phone package gives you unlimited calling anywhere in the continental United States and Canada for one monthly low price and includes free Call Hunting. Plus the ability to add calling features to meet your needs such as voice mail, caller ID and others.\*\* Unlimited Calling includes:

- ▶ Unlimited in-state, state-to-state, U.S. to Canada long distance calling.
- ▶ Unlimited Regional Calling
- ▶ Unlimited Local Calling

#### ■ Unlimited Local Calling

This phone package offers unlimited local calling for one low monthly price and includes free Call Hunting. Plus the ability to add calling features to meet your needs such as voice mail, caller ID and others.\*\* Add Unlimited Regional Calling for just \$10 more a month.

#### ■ Variable Long Distance Plans

No need for unlimited long distance? No problem. RCN offers several long distance plans for you to choose from. Talk a lot or a little, it doesn't matter. You only pay for what you use. We'll even add PIN code access so only your authorized staff can make long distance calls. For more details, see the [variable long distance rate plans](#) for your area.

#### ■ Calling Features

RCN's choice of 30 calling features help make your business calls easier and more efficient. From voice mail, to call forwarding to Caller ID Deluxe, we'll help you get the calls you need and avoid the ones you don't. Review our list of calling features below.

#### Privacy

## About Us

Getting down to business.

RCN Business Solutions is the wholly owned, but separately managed, division of RCN Corporation dedicated to serving the communications needs of the business community.

RCN Business Solutions is a licensed Competitive Local Exchange Carrier (CLEC), a Competitive Access Provider (CAP), Internet Service Provider (ISP), Multi-Service Operator (MSO) and Fiber Optic Network Constructor. This unique combination of capabilities provides significant value and choice to the business community.

### RCN Business provides network-based communication services to:

- Telecommunication service providers: CLECs, wireless carriers, Internet service providers, facility-based carriers, non facility-based carriers, resellers, regional area network companies, national Tier I and Tier II carriers.
- Enterprise accounts: Hospitality/lodging, broadcast media; education; finance; construction; and real estate vertical markets.
- Government accounts: Federal, State and municipal agencies and entities.

RCN Business Solutions is focused on the provision and management of the "First Mile" connectivity from the customer site to the RCN Network using fiber optic cables.

### RCN Business Solution strengths and recent accomplishments include:

- Providing seamless quality over a state-of-the-art fiber-optic network.
- Acceleration of customer operational efficiency through the use of advanced network assets and solutions.
- Flexibility to add new client services without compromising quality.
- Addition of +200 client buildings to our network for a total of more than 500 on-net sites.

### Products and Services include:

- [Transport](#): SONET DS-3, OC-3, OC-12, OC-48 for data, voice and video integrity.
- [True Fast and Gigabit Ethernet](#) for LAN extension with no protocol conversion.
- [Broadband Access](#) for fiber optic connectivity to directly connect client offices to the fiber network.
- [Managed Dedicated Server solutions](#) to manage client computer servers located on RCN Business Solutions sites.
- [Website Hosting](#) on Dedicated and Shared RCN Business Solutions servers.
- [IP Transit](#) designed to move data over fiber-based IP protocol transmission paths.
- [Internet Services](#) (including email).
- [Business Video](#) economically delivered in bulk over fiber and with clustered modem management.
- [Voice Services](#) including Switched, 800 number service, audio conferencing, private lines.
- [Colocation](#) of client equipment in RNC Points of Presence, city hub sites, carrier hotels.
- [Real Estate Development infrastructure solutions](#) to deliver the best technology to future tenants.
- [Acquisition of Consolidated Edison Communications](#) in New York City to raise the total number of on-net buildings to over 800.

RCN Business Solutions provides an unparalleled set of business services as a CLEC, CAP, ISP and MSO. All of our solutions are delivered over the RCN state-of-the-art fiber optic network. We have construction resources available to build the "First Mile" connectivity from the customer's location onto the RCN network. Once connectivity is established RCN Business Solutions provides a range of services: switched voice, broadband transport, IP data service, Internet services, business video, managed servers, and hosting.

Our team of professional sales executives, system engineers, project managers and customer care personnel provide network-based solutions to thousands of businesses that are on or adjacent to our fiber network. We provide managed solutions with multi-year contracts to facilitate customer return on investment. Additionally, RCN Business Solutions specializes in creative contract terms and conditions.

RCN Business Solutions offers a unique array of fiber-based services that can be mixed and matched to meet the complex needs of business customers. We can construct fiber-based solutions that exactly comply with client requirements quickly and economically. We have dedicated client teams that form the proper solution, design it, install it, maintain it and expand it to meet growing client demands. The flexibility of our product offerings delivers valuable services such as business TV and Internet over uniquely designed fiber optic network facilities. When customers put challenges to us, we delight in meeting them.

Our strategy builds on the fact that RCN Business Solutions has unparalleled fiber optic network density, business access in five key metropolitan markets, advanced network technology and an enhanced product line. All of our solutions are delivered over a fast and powerful platform designed to support Wholesale Telecommunications, Enterprise and Government requirements.

**The main elements of our strategy are:**

- Maximize market penetration into the +20,000 "near net" buildings (those within 500-feet of the network).
- Expand the domestic and international carrier customer base.
- Optimize returns on our core assets through operational improvements, further penetration of "lit" buildings.
- Continue to engage solution partners to add value to our core propositions.
- Selectively evaluate assets that match our core competency and find ways to ally, venture and/or acquire them.
- Continue to build the professional sales team and to exploit opportunities in key markets.

## US Local ISDN

AT&T's DS-1 ISDN PRI Local Service offers an efficient way to integrate your local voice, data and video communications on the same high-performance digital trunks using industry-standard ISDN Primary Rate Interface technology, typically with savings of 10% or more over incumbent local carriers. This all-digital service connects your digital PBX (or other digital premises equipment) directly to the AT&T Network over ISDN-configured T1 facilities that can be used for virtually any combination of voice, video, or switched data transmissions. There is no need to designate certain channels for each type of transmission; your bandwidth is allocated automatically for each transmission on a call-by-call basis.

AT&T DS-1 ISDN PRI Local Service includes:

- a full DS-1 ISDN PRI , PrimePlex, is designed for locations that need dependable connectivity for local and local toll calls, long distance and international voice, as well as video and switched data services. It supports inbound and outbound calling, as well as access to toll-free service.
- a specialized ISDN-based trunking solution, PrimeConnect PRI is for applications and locations that receive very high volumes (200,000 to 400,000 minutes per month) of inbound-only traffic.
- make the most efficient use of your available bandwidth, and potentially handle all your traffic with fewer trunks
- nationwide coverage with a competitive pricing structure
- unsurpassed performance that comes with 100% digital connectivity and AT&T's industry-leading 24 hour network monitoring and management that provides 99.99% uptime
- through the use of AT&T DS-1 ISDN PRI with AT&T Local and AT&T Local Toll calling to help justify dedicated T1 access at smaller locations savings over multiple separate facilities:
  - the 23 bearer channels (each approximately equivalent to a typical phone line) can be used for any combination of voice, switched data, or video transmissions automatically allocates the channels on a call-by-call basis, allowing customers to make the best possible use of their available capacity
  - automatically allocates the channels on a call-by-call basis, allowing customers to make the best possible use of their available capacity

### Global Crossing Outbound Service

#### OVERVIEW

##### **Speak freely, communicate globally**

Talk to offices, customers, and business partners around the world with Global Crossing Outbound Service. Voice Service with a single rate and a single bill for international calls. (Local and national calling available too.) Eliminate the frustrations of patchwork international calling services and inscrutable bills with Global Crossing's seamless network and integrated services.

#### FEATURES AND BENEFITS

- **Worldwide, seamless service** - call to 240 countries worldwide.
- **National service in the United Kingdom and the United States** - local, interstate, and intrastate calling (connect to in-country, in-state, or out-of-state locations).
- **Quality and reliability** - calls route over ultra-high bandwidth Global Crossing network with speed, clarity and network reliability backed by competitive customer support.
- **Flexible, future-proof solutions** - ready to move you to next-generation IP-based communications and data transmission.
- **"Any-distance pricing"** - prices are the same regardless of originating country for international calling. Allows you to manage costs across multiple countries with stability and predictability.

Communicate clearly and cost-effectively with Global Crossing Outbound Services. Contact your Global Account Manager or [click here](#).

## BUSINESS LINES AND TRUNKS

InfoHighway's Business Lines and Trunks are ideal for small- to medium-sized business customers looking for a reliable voice telecommunications service to connect their company to the world. Whether it's a single analog POTS line for your fax machine or multiple trunks to carry incoming and outgoing voice calls to and from your PBX or Key system, InfoHighway has a solution to meet your needs.

**BUSINESS LINES** provide analog voice communications and a local telephone number to business customers. It also enables the transmission of data at speeds up to 56 Kbps. You can purchase a basic dial-tone line or select from an array of features, all designed to help you save time, control costs, and work more efficiently.

Features available on InfoHighway Business Lines include:

- Call Forwarding
- Call Waiting
- Three-Way Calling
- Call Waiting
- Caller ID & Caller ID with name
- Distinctive Ring
- Hunting

We offer a variety of usage packages with all of our voice lines, including measured usage (usage is billed a la carte) and usage bundles with unlimited local, regional and long distance minutes.

**BUSINESS TRUNKS** provide voice communications to business customers equipped with Private Branch Exchange (PBX) systems that require a local telephone number and multiple line accessibility to their systems. It also enables the transmission of data at speeds up to 56 Kbps.

There are various types of InfoHighway Business Trunks to choose from:

- Combination (2-way) Trunks
- Direct Inward Dialing Trunks
- Ground and Loop start services

### InfoHighway Networks Services Include:

Voice Communications Services  
High-Speed Internet Access  
Managed Network Security Services  
Value Added Services, Hosted Intranet  
Audio and Web Conferencing  
All wrapped together in one bill.

## Voice Services

### Overview

Voice communications have always been the cornerstone of our industry. PAETEC recognizes that superb quality and reliability are critical aspects to the success and positive image of our customers.

From local and long distance to VoIP, PAETEC offers a full spectrum of traditional and next-generation voice services, each predicated on our enormous industry expertise and the world-class technology of our partners.

#### The Foundation of Communications

As network traffic migrates from traditional TDM (Time Division Multiplexing) to modern packet-switched IP (Internet Protocol), legacy voice networks become increasingly expensive to install, maintain, and operate. PAETEC understands how challenging systems integration can be and has proven solutions to help your business achieve maximum efficiency and productivity from both your legacy and next-generation technologies.

We understand that your business must maximize current voice investments while providing flexibility to incorporate emerging technologies. That's why our VoIP technology is proven and reliable, allowing you to maximize both previous and future system investments while working with your existing phone systems, helping you hold the line on capex costs and avoid integration worries.

Converting voice telephone calls to IP packets can bring many benefits to your firm, and PAETEC VoIP for business is dramatically different than the "best-effort" VoIP across the Internet. VoIP for business is high-quality calling across a dedicated and secure network that has full support for the safety (911) and convenience features your users expect.

How can PAETEC VoIP help you?

- Reduce costs through bundled communications
- Maximize data speeds by dynamically allocating bandwidth & compressing voice
- Improve the disaster preparedness and recovery capabilities of your organization
- Extend the features and services expected in the office to remote workers and business travelers
- Simplify moves-adds-changes and billing while increasing service options

### Voice Solutions : Long Distance

## Qwest Choice™ Long Distance Plus

Make all the domestic long-distance calls you want for just 5 cents a minute. Enjoy the convenience of no calling-time restrictions and no monthly fee.

### Features

- No calling-time restrictions or monthly fee
- Flat per minute rate for all domestic long-distance calls
- Requires \$15 minimum in long-distance calls

### Benefits

- Best for businesses that average \$15-\$25 in monthly long-distance charges
- Add on an International calling plan and save even more.

**Qwest Choice™ Long-Distance Plus Plan for Business:** Available only to Qwest local-service business customers within Qwest's 14-state region or all other domestic business customers outside of Qwest's 14-state region, excluding AK. Limitations exist for 1+ service, data applications, dial-up data (modems) and fax traffic. Depending on the location, long-distance service is provided by either Qwest Communications Corporation or Qwest Long Distance Corporation. Listed rate covers calls only within the U.S. and to Puerto Rico, Guam, USVI and CNMI and does not include taxes, incremental charges and surcharges. Other restrictions may apply. Subject to applicable tariffs and regulations. Rates subject to change.

## DS1

### High volume, no waiting

Qwest's DS1 service puts you in control with a high-capacity, high-performance dedicated digital information channel designed for full duplex point-to-point transmission at 1.544 Mbps. Voice, data, video - you call the shots. And because the signal is digital, say goodbye to crosstalk, noise, and distortion. So you can focus on your business.

- Connection to interexchange carriers
- LAN-to-LAN connectivity
- Integrated voice and data networking
- PBX networking
- Bulk data transfer
- Interactive computer-aided design
- Distance learning
- Video teleconferencing
- Replacement of multiple analog lines
- Upgrades from digital systems operating at lower speeds
- Remote mainframe access
- Transaction-based tasks: billing, reservations, customer service, database access
- PBX connection to Centrex
- High degree of system security
- Budget predictability with discounts available on long-term contracts

DS1 service is available in the contiguous United States and, on an intraLATA basis only, in the states of AZ, CO, IA, ID, MN, MT, ND, NE, NM, OR, SD, UT, WA and WY.

DS-1 will reduce overall expenses and control costs by combining data and voice applications over one circuit. DS-1 does all of this with flexible intrastate and interstate pricing plans. In many areas DS-1 service is available as part of Qwest's Sonet Ring Services with industry-leading levels of reliability, redundancy, and value.

### Features

Optional Features and Functions may be added to DS-1 Service to improve its quality or its utility to meet specific communication requirements. Available DS-1 Optional Features and Functions include:

- Central Office Multiplexing: This equipment is

# OneFlex Integrated Access

## **The power of high-speed digital transport and dynamically allocated bandwidth on a single circuit**

Qwest's OneFlex® Integrated Access provides a simple solution with a single circuit that combines both voice and data. Additional features are integrated into the product to assist in running your business more efficiently. Competitively priced, OneFlex Integrated Access allows you to transition from standard telephone service to Voice over Internet Protocol (VoIP) without the need to replace your current telephony equipment. With dynamically allocated voice bandwidth on demand, you have the opportunity to build a solid, stable communications foundation that will grow with your expanding business needs and provide the competitive edge to succeed in the marketplace.

### **Description**

OneFlex Integrated Access is a single T-1 circuit that can be used to transfer data, access the Internet and have real-time, two-way voice calls via IP. It is designed to meet the voice and data needs of single and multi-location businesses. You can make off-net domestic local toll, domestic long-distance and international calls to end users on the public switched telephone network (PSTN) as a low-cost option. Also available are popular calling features like Caller ID, Voice Mail and e-mail. Additionally, calls between users on the Qwest® OneFlex VoIP network are at no additional charge, which is a powerful feature that delivers savings on calls between your locations and your business partners. Qwest delivers all of this as a robust nationwide offering, providing your business with the tools and support for all of your communications needs.

### **Benefits**

- Simple solution—Local, long distance, international voice, fax and data services from one provider with all product components included on a single invoice.
- Cost savings—Single and multiple business locations benefit from this technology and reduce overall communication costs. By leveraging your current investments in existing private branch exchange (PBX) and key system equipment, you have the flexibility to spend in other essential areas of your business.
- Pivotal product for advanced technologies—Qwest can provide an integrated solution that meets your specific needs using a flexible IP network. The service also provides a foundation to move your business to higher-end products.
- Increased efficiency—Management of all telecommunications needs is bundled in to one technology.

### **Features**

- Consolidation of multiple traffic types over a single circuit.
- Support of additional data speeds up to 1.544 Mbps.
- Up to 13 OneFlex Integrated Access voice lines available.
- Real-time dynamically allocated bandwidth between voice and data channels.
- Unlimited local and on-net calling.
- Customizable feature configurations to meet your daily needs.
- Termination to existing PBX or key system equipment.
- Selectable voice mail capabilities.
- Customer portal to manage hunt-group feature changes.

### **How it works**

OneFlex Integrated Access uses VoIP technology to provide dynamically allocated bandwidth between voice and data in real time. The offering is an IP-based solution that integrates local and long-distance voice with Internet access on a single connection. VoIP technology gives customers the advantage of using the entire circuit for Internet access when phones are not in

use. The Qwest technology management team has built thresholds within the product to ensure high IP quality, regardless of the number of voice lines in use.

### **Why buy from Qwest?**

- Network technology—Tier 1 carrier-class network.
- Breadth of the product—Qwest has a nationwide footprint to meet all your business needs, wherever you are.
- Reliable account team service—Qwest has an extensive infrastructure and abundant support/resources to provide a stable solution.
- Extensive product integration—Qwest's full portfolio of services can be your single-source solution.
- Qwest legacy/heritage—Service is carried over the local exchange network, an arena Qwest knows very well. As a frontrunner in VoIP provisioning, Qwest will prepare you to move into the future.

### **Other products available from Qwest**

In addition to OneFlex Integrated Access, Qwest has an array of products to meet your needs, including the following:

- Managed Firewall-VPN—Uses best-in-breed encryption and security solutions for your IP traffic.
- OneFlex® Hosted VoIP—The next step within the VoIP product family—this service increases bandwidth and adds features to your current configuration through handsets and a customer portal.
- Internet Port—Provides a full port for public IP traffic. Bandwidth is available from fractional 1.544 Mbps T-1 service up to NxT1 solutions that bond T-1 service together to accommodate your bandwidth requirements.
- Private Port—Provides an Internet port that is fully secured on Qwest's multi-protocol label switching (MPLS) network. Advance queuing of your voice, IP, video and any other traffic is managed via multiple quality of service (QoS) templates.

OneFlex® Integrated Access is available to business customers in select areas across the continental U.S. Minimum one-year term commitment required. Early termination charges may apply. Monthly charge based on configuration selected. Long-distance charges are additional. Additional equipment may be required. Not compatible with Qwest Web Contact Center™, EZ Route and QRouting™. Other restrictions may apply. Call for availability and complete details.

## THE POWER DRIVING YOUR NETWORK

Time Warner Telecom is at the forefront of the telecommunications revolution. We are a leading fiber, facilities-based integrated communications carrier offering local businesses "last mile" broadband connections for data, high-speed Internet access and voice. Our SONET-based networks include 100% fiber optic, fully redundant, self-healing digital rings. Diverse routing is standard on most of our metro services. You experience the highest quality voice, data and video communications transmission possible. Our innovative National Operations Center (NOC) monitors all our networks for reliability and performance, 24-hours-a-day, seven-days-a-week.

### DATA & TRANSPORT SERVICES:

**DEDICATED INTERNET ACCESS** – Connect your business to Time Warner Telecom's national IP backbone and experience the high-quality Internet service that your company deserves. Our dedicated Internet Access product delivers high-speed, dedicated connections that ensure access to the Internet bandwidth you need for your critical data. Choose from traditional (T1, DS-3, or OC-3) and Ethernet (10Mbps, 100Mbps, or Gigabit Ethernet) connectivity.

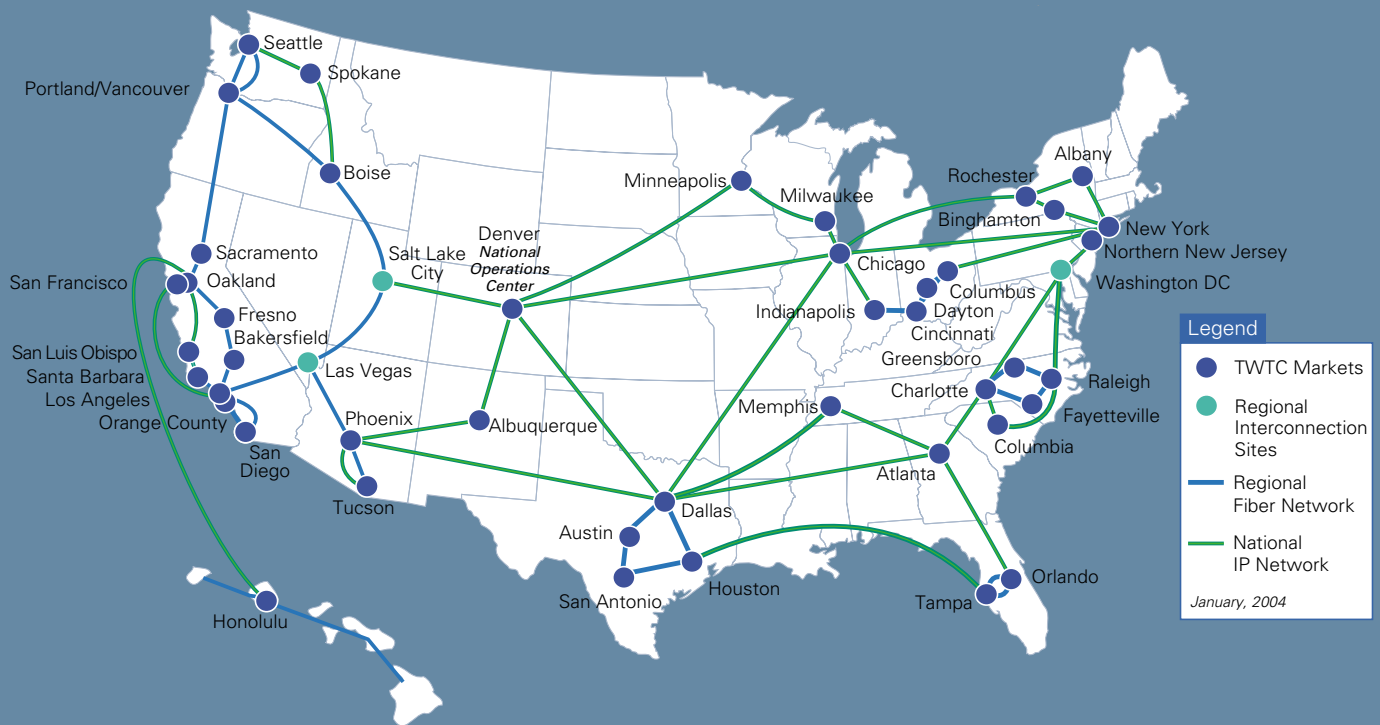

### DEDICATED HIGH CAPACITY SERVICES –

A full array of dedicated, fiber-optic transport products and services are available for your business, including SONET-based and DWDM-based private lines and IXC access; in point-to-point, ring, and hubbed configurations. Dedicated services include: DS1, DS3, OC3, OC3c, OC12, OC12c, OC48, OC48c, 2.5 Gbps wavelengths, and 10 Gbps wavelengths. Private Network Transport (private rings) are also available.

**NATIVE LAN** – Native LAN bridges the gap between legacy networks and a pure Ethernet metro solution by combining their benefits using next-generation optical platforms. This provides you a migration path for the evolving metropolitan area Ethernet technology. We deploy equipment in your business location and allow you to plug into a familiar interface: IEEE Standard 10M, 100M, and 1000M Ethernet interfaces. You can connect between multiple locations and assure delivery of your valuable traffic with our protected service. Native LAN lowers your costs, reducing the need for a customer router and enabling installation with minimal disruption to your existing network.

### STORAGE TRANSPORT SERVICES –

How secure is your data? Are you thinking about disaster recovery methods? Time Warner Telecom knows that accessing and preserving your data is critical for the success of your business. Now, we can help you transfer your important data information securely

to your off-site storage facility or to the storage solution provider of your choice.

#### VOICE TELEPHONY SERVICES:

##### LOCAL SERVICE FOR BUSINESS –

Time Warner Telecom offers business customers a “real” choice for local telephone service, including: local business telephone lines and digital trunks, Primary Rate ISDN, 9-1-1 emergency services, operator services, directory information and listings. Features like caller ID, call waiting, call forwarding, three-way conference calling, call redirect, last call return, voice messaging and many others are also offered.

##### BUSINESS LONG DISTANCE –

Everyone has a long distance product these days. But only Time Warner Telecom offers customers innovative business solutions. Our Long Distance services include Outbound (1+ Dialing) Domestic; Operator Services and Directory Assistance, and Toll Free (8XX) Service. Our Calling Card Service offers instant access to anywhere in North America, and over 200 countries world-wide.

#### INTEGRATED BUSINESS SERVICES (CUSTOM COMMUNICATION SOLUTIONS) –

For medium-size business customers, VersiPak provides a single-vendor solution that combines your local voice, Internet, and long distance services onto one dedicated clear channel T-1. When the voice channels are not being used, that bandwidth is dynamically allocated for maximizing your bandwidth.

#### ABOUT TIME WARNER TELECOM

Time Warner Telecom is the leading provider of metro-area broadband optical networks and services to businesses. We deliver “last-mile” broadband data, voice, and Dedicated Internet Access in 44 major U.S. markets. Our strong financial position allows us to deliver powerful networks, robust products, and superior customer care to meet your needs. We’re the power driving your network.
